As representant of Innoskart Digital Cluster, an active collaborator of BIOVEGEN, I bring all my support to INVEGEN, entity which is submitting the proposal **"BIOVEGEN-Plataforma Tecnológica de Biotecnología Vegetal: periodo 2025-2026"** to the call **"Plataformas Tecnológicas y de Innovación 2024"** launched by the Spanish Ministry of Science, Innovation and Universities through its State Research Agency.

Innoskart is a digital cluster catalysing and giving impetus to business relationships, accelerates responses, stimulates digitalisation efforts and facilitates their implementation. We have 75 members companies including SME's and academia. from digital service providers to a wide range of manufacturing companies including the agrifood sector.

Innoskart has been participating at several (currently 6) European projects and we area also a Digital Innovation Hub.

See more at: <https://innoskart.digital/en>

In Innoskart Digital Cluster, we are aware that BIOVEGEN - Spanish Technology Platform for Plant Biotechnology is a public-private partnership, led by the business sector, which brings together entities from the agrifood sector with an interest in R&D in applied Plant Biology. Its aim is to improve the agrifood sector competitiveness through the entities, connecting technological offer & demand and generating business opportunities through public-private collaboration. It performs as an interface between academy, industry, and Administration, offering tools to facilitate R&D activities for its members. Currently, the Platform has 185 members: 160 companies and 25 research centres, as well as the Spanish Ministry of Science, Innovation and Universities, which supports and co-finances this initiative. Furthermore, BIOVEGEN is open to partnerships with other entities within the sector.

Therefore, we wish that this collaboration between Innoskart Digital Cluster and BIOVEGEN can continue and grow in this new stage of the Platform's development.

Yours sincerely,

Zsolt Keresztúri
Cluster Manager, Managing Director
